Site planning and clearing for new construction should be accomplished, insofar as is feasible, in a manner which respects and preserves existing trees, vegetation and land contours. Trees immediately adjacent to the construction site should be protected to avoid damage.

### 3. APPROVAL

Approval by the Committee is not a guarantee that the project can be completed as presented. The owner or contractor must insure that the buildings or structures are located on the property as shown on the site plan. Plan approval by the Committee does not imply responsibility for the actual location of the buildings or structures.

Approvals are contingent on the accuracy and validity of information contained in the application. Any misrepresentation will void the permit.

Yes, I have read the Architectural and Environmental Control Rules and Regulations and hereby acknowledge that those requirements will be complied with.
